

AI DATA SCIENCE SEMINAR

SEMINAR OVERVIEW

The Seminar focuses on the application of artificial intelligence and data science technologies to achieve data-driven solutions. The accelerated training will empower participants to apply artificial intelligence, statistical and computational modelling to develop data-driven products and services. Participants can select one the following tracks:

- Technical/Developer Track
- Managerial/Analyst Track

SEMINAR OBJECTIVES

At the end of the seminar, participants will be able to:

- Apply AI and Data Science Technologies

Managerial/Analyst Track

The seminar focuses on cultivating the following managerial competencies that are sets of knowledge, skills, behaviors, and attitudes for participants to be effective in a wide range of AI Data Science managerial jobs and various types of organizations.

1. **Strategy** — Case Studies of AI and Data Science Applications.
2. **Managing AI Data Science Applications and Machine Learning** — Overview of artificial intelligence technologies and data management tools to support management decisions for effectively advancing the organization.
3. **Planning and Administration of AI Data Science** — Deciding what tasks need to be done, determining how they can be done, allocating resources to enable them to be done, and then monitoring progress to ensure that they are done.

Technical/Developer Track

The seminar focuses on cultivating the strategy to develop the following competencies that are sets of knowledge, skills, behaviors, and attitudes for participants to be effective in a wide range of AI/Data Scientist jobs and various types of organizations.

1. **Strategy** — Case Studies of AI and Data Science Applications.
2. **Developing AI Data Science Applications and Machine Learning**— Overview of applying artificial intelligence technologies and machine learning techniques to manage company's big data, organizational data and data-driven products, for effectively advancing the organization.
3. **Data Visualization & Communication** —Using data visualization tools to help others make data-driven decisions, and to effectively explaining the principles behind visually encoding data and communicating information, describing the findings, or the way techniques work to business stakeholders, both technical and non-technical.

SEMINAR DELIVERY:

The 7-Day seminar is confined on a Cruise setting that consists of Seminars and breakout discussions.

SEMINAR REQUIREMENT AND PREREQUISITES:

- No technical or managerial background is required.
- Minimum 21 years of age.
- Career interest in the AI and Data Science

WHO SHOULD ATTEND?

Anyone with interest in applying Artificial Intelligence and Data Science technologies but has no prior training or experience.

Target Audiences: Managers and Developers interested to learn about the latest in AI and Data Science technologies.

Duration of Time: 7-day Seminar

Takeaways: Strategic Plan for developing management and technical skills in AI and Data Science technologies.

Start Dates: May and October

WHO WE ARE

We Accelerate Your Growth in a Global Setting.

Global Leader in Business and Academic Consulting

Founded by business and academic leaders, FTG helps our clients apply state-of-the-art business techniques, emerging technologies and global best practices to accelerate their individual and organizational growth.

Innovation and best practices drive major markets around the world. Based in the financial district of New York, FortuneTimes Group (FTG) accelerates individual and organizational understanding of the convergence of business, technologies and global best practice. We partner with international organizations large and small to identify opportunities to launch new products, penetrate markets, strengthen internal operations, enhance branding, increase revenues and confer lasting competitive advantages.

Our Approach: FTG works with Ivy-League faculty and Wall Street executives in a multi-national setting, to deliver unique symposia, seminars and interactive professional development training courses. Tapping into the rich business leadership culture of New York City, FTG programs showcase thought-leaders, authors and innovators. Participants measure the outcomes of FTG programs by the rate and speed through which they implement and incorporate new understandings and expertise.
